PROFESSIONAL SUMMARY

PENN LPS, Philadelphia, PA

June 2019 - September 2019

Software Developer Student

- Completed an immersive and fast paced 12 week coding boot camp.
- Gained experience in becoming a full stack web developer by creating projects from end to end and learned how to code as a team.

Development Projects:

Friendly Fridge

Web application that allows the user to create a virtual fridge and monitor the food inside similar to that of a smart fridge. Food displayed in your fridge would change colors depending on the expiration date of your food. Roles were divided within a six people team split between front end and back end. Technologies used in this app were, MongoDB, Express, React.js, Node.js, JavaScript, HTML, CSS, Passport, Unsplash API, Mongoose, bcrypt, axios, Bootstrap, and MomentJS.

Hot Houses in Philadelphia

Web application allowing the user to search for a list of properties that were under assessed using the Zillow API along with Google Maps API for the location of the property. Within a team of three, this was built using HTML, CSS, Bootstrap, JavaScript, and JQuery

CENTURY 21 TARGET REALTY, Philadelphia, PA

June 2016 – June 2019

Receptionist and Agent

- Responded to maintenance requests in a timely manner to provide quality service and maintain customer retention.
- Ensured that renting procedures followed documentations to validate the accuracy of signed documents
- Handled high volume transactions with each transaction containing a large amount of money.

KUNG FU TEA, State College, PA

March 2015 – May 2016

Customer Service Representative

- Learned how to make and prepare an extensive list of drinks resulting in high customer satisfaction.
 - Performed cashier duties and learned other roles to be more agile which led to a more efficient working process.
-
